

Christmas Mailbox Topper

We are looking to enter into this market with a design that does not look as traditional as the wreath material shown below.

We also are not opposed to having a christmas themed product with this style where the topper does not wrap around the mailbox:

This might look good as an ornament or christmas tree! We welcome creativity on the object's design.

Our original idea is that our product will use the grapevine material featured in one of our existing products: the outdoor LED light ball (shown below).

We want your design to be creative! It does not have to look like our competition. We want to stand out with a better looking product that lights up!

Take a look at our website: elflogic.com to see our other products for inspiration. And our Amazon store:
